Panel 1

Image not available

Panel 1: Vasi, a young mechanic with messy hair and protective goggles pushed up on his forehead, stands in his cluttered garage workshop, gasping in horror at an empty charging pedestal with disconnected cables dangling loose.

Panel 2

Image not available

Panel 2: Vasi navigates a bustling, rainy alleyway in the city, clutching a handheld tracking device while following a faint trail of glowing neon-blue oil droplets on the wet pavement.

Panel 3

Image not available

Panel 3: The lost little robot, a rounded retro-style companion with brass plating and tank treads, sits huddled under a rusted metal overhang in a towering scrapyard, its screen blinking a red low-battery warning.

Panel 4

Image not available

Panel 4: Vasi's tracker beeps furiously as he pushes through the towering junk piles, his flashlight beam cutting through the gloom to reveal the faint, familiar glow of his robot's optic sensor.

Panel 5

Image not available

Panel 5: Vasi sits in the junkyard hugging the little robot tightly against his chest, plugging a portable power pack into it; the robot's visor now glows with a happy digital heart symbol.
